TESTIMONIAL FROM TREY LANFORD:

When we moved into our home in 2017, the previous homeowners didn't take care of their lawn. Typical, right? After a year of getting the house up-to-speed, it was fall of 2018 and I was just becoming interested in DIY lawn care and was tired of our "salad bar" lawn. I decided to oversee and put some fertilizer down; after a few days of going down an internet video rabbit hole, I ran across several videos (and blogs) that mentioned Lawn Restore®. I had no idea what "organic" lawn care meant, nor how to start. But, after weeks of research, I finally decided to jump right in and start using your product on a regular basis. So, a completely renovated lawn later, and regular feedings of Lawn Restore®, my lawn looks like something out of a magazine - my wife and neighbors have repeatedly asked me what my secrets are, and I repeatedly mention my regular use of Lawn Restore®!! It has turned my lawn 180° in the opposite direction and I couldn't be prouder! I am all in on this stuff, and can't wait to keep my lawn and soil healthy with Safer® Brand products! Thanks for such an awesome fertilizer!

TESTIMONIAL FROM LISA LEE:

We had spots in our grass where the grass was not growing or was just weeds. We bought and used the Lawn Restore® and used it and it did a wonderful transformation on our yard! As you can see in the pictures from before and after. Another reason we used your brand is that it was safe for our dog Miss Bella which you can see in the second picture! She runs all over this yard and the Lawn Restore® never bothered her at all.
