# MOSQUITO MAGNET®

## Advanced Mosquito Defense Systems

Mosquito Magnet® traps work by attracting and capturing mosquitoes and other biting insects that are breeding in yards. Natural mosquito repellents are only a short-term solution and mosquito zappers are ineffective outdoor mosquito control.

Mosquito Magnet® traps are the leading long-term solution scientifically proven to safely and effectively control mosquitoes.

### How It Works

You may have tried to solve your mosquito problem by using a spray repellent or mosquito candles. While these remedies may offer temporary relief in getting rid of mosquitoes, they are typically an ineffective and short-term approach. Mosquito Magnet®, on the other hand, acts as a mosquito power trap by capturing and killing these harmful pests.

- Propane is converted to carbon dioxide (CO<sub>2</sub>) mimicking human breath
- An attractant is used to enhance the lure
- Mosquitoes follow the plume of attractant and CO<sub>2</sub>—thinking it's human prey
- Drawn in by the trap's CounterFlow™ Technology, mosquitoes are captured by the net
- Trapped mosquitoes dehydrate & die within 24 hours

1.

**Set the trap in your yard.**  
It should be 30-40 ft away from people and in shade.

2.

**Trap's Patented technology converts propane to CO<sub>2</sub>.**  
The CO<sub>2</sub> released attracts mosquitoes towards the trap.

3.

**Secondary attractant mixed with CO<sub>2</sub> attracts mosquitoes.**  
It increases the mosquito catch rate by up to 10 times.

4.

**Patented technology.**  
Mosquitoes get sucked into the plume and into the net.

5.

**Mosquitoes dehydrate and die in the net.**  
Once in the net, the mosquitoes will dehydrate and die within 24 hours.

6.

**Enjoy a mosquito free backyard!**  
Enjoy outdoors like never before.

Taking Back Neighborhoods One Yard at a Time

# TRAPS

Model #	Patriot Plus Model #MM4200	Executive Model #MM3300
Power	50' A/C Power Cord	Rechargeable Battery
Coverage	Up to 1-Acre	Up to 1-Acre

## ATTRACTANTS

### Mosquito Magnet® Octenol (OCENTOL3)

- Recommended attractant for those who live on the coast or Northern regions of the U.S.
- Attracts most mosquitoes including salt marsh mosquitoes, as well as no-see-ums and black flies.

### Mosquito Magnet® Roctenol (ROCENTOL)

- Recommended attractant for those who live on the coast or Northern regions of the U.S.
- Works the same as regular Octenol, but lasts 40% longer - up to 30 days!

### Mosquito Magnet® LUREX3 (LUREX3N)

- Recommended for Southern regions of the U.S and in Hawaii (except Southern coastal regions where Octenol should be used)
- Attracts mosquitoes, particularly the Asian Tiger Mosquito and species that may transmit West Niles Virus, Encephalitis and Heartworm

# ACCESSORIES

## NETS

### Mosquito Magnet® Executive Net (MM3300NETN)

- New rigid, self-contained mosquito net especially engineered to maximize continuous, unblocked airflow (critical to performance of mosquito trap)
- Features increased capacity to extend the life of the net before needing replacement

### Mosquito Magnet® Independence Net (MM3200NETN)

- Drawstring on the net makes disposal and replacement of the net simple
- The Liberty Plus/Independence net is 50% larger than the Original Liberty net allowing for an increased catch rate

### Mosquito Magnet® Patriot Plus Net (MM4200NETN)

- For use with Patriot Plus traps
- Rigid bag is self-contained, allowing for easy disposal and replacement
