Attract, Trap and Kill Mosquitoes and other flying insects, including Biting Flies, Wasps, Moths, Stink Bugs, No-see-ums and more!

OUR MISSION

At DynaTrap[®], we are committed to designing innovative and effective solutions to protect people from mosquitoes, biting flies, and other insects, both indoors and out.

ULTRAVIOLET RAYS The DynaTrap's special UV bulb generates warmth and UV rays, attracting flying insects night and day.

TITANIUM DIOXIDE COATING

The exclusive TiO₂ (Titanium Dioxide) coated surface produces CO₂ (Carbon Dioxide), irresistible to mosquitos. This occurs through a photocatalytic reaction, when UV rays hit the TiO₂ and organic matter (pulled in by the airflow from the fan) turns into CO₂ and H₂O (water vapor).

POWERFUL VACUUM ACTION FAN

DynaTrap's powerful, yet whisper-quiet fan draws insects into the retaining cage, where they are trapped by the vacuum action, and eventually dehydrate and die (usually within 24 hours). The retaining cage is removable, allowing the contents to be emptied into the trash.

Attract, Trap and Kill Mosquitoes and other flying insects, including Biting Flies, Wasps, Moths, Stink Bugs, No-see-ums and more!

OMNATRAP SMART, SILENT, SIMPLE.™

DT152 INSECT TRAP

THE COMPACT TRAP THAT GOES NHERE YOU GO

300 SQ. FT. COVERAGE

For Indoor and Sheltered Outdoor Use

Ultralight and Easy To Set Up

Odor-Free /

ACCESSORY:

Glue Card

Whisper-Quiet – No Zapping Noises

Travel Size - Great For Camping and RVs

The versatile DynaTrap® DT152 won't weigh you down. It operates economically and is easy to set up. It traps insects without chemicals being added to the environment or the surrounding area.

Our award winning DynaTrap® technology uses a 3-way protection plan for insect extermination. A UV-emitting fluorescent bulb produces warm and bright light that attracts insects to the unit. The DynaTrap® also produces carbon dioxide, which is irresistible to mosquitoes. After Insects and mosquitoes are lured to the trap, the powerful fan draws them into the retaining cage where they dehydrate and die. 21523 Indoor StickyTech™

FEATURES

- Smokeless & odor-free
- Operate 24 hours a day, 7 days a week

Intertek

- Provides up to 300 sq.ft. coverage
- Easy to set up & whisper-quiet
- 1 year limited warranty
- Includes: Non-replaceable CCFL UV Bulb approx. 20,000 hours (2.25 years), and 6 ft. cord (100V -240V)

Our Customers Say It Best...

"With two small children, we wanted a permanent solution that did not involve the use of pesticides." - Melissa M., Poland, OH

DT160 INSECT TRAP

GOOD THINGS COME IN SMALL PACKAGES

^{*}¹/₄ ACRE COVERAGE

Durable All-Weather Construction

🗸 Odor-Free

Lightweight and Easy To Set Up
 Whisper-Quiet — No Zapping Noises

CONTRACT:

The perfect size to protect urban and suburban yards and patios, the DynaTrap® DT160 operates economically and is easy to set up.

Our award winning DynaTrap® technology uses a 3-way protection plan for insect extermination. A UV-emitting fluorescent bulb produces warm and bright light that attracts insects to the unit. The DynaTrap® also produces carbon dioxide, which is irresistible to mosquitoes. After Insects and mosquitoes are lured to the trap, the powerful fan draws them into the retaining cage where they dehydrate and die.

PATENTED DAMPER

The DT160 has a patented feature that prevents insects from escaping when replacing the bulb. The automatic damper closes when the unit is turned off, ensuring any insects still alive in the retaining cage cannot fly away.

FEATURES
