Standardized serial number format that is easy to interpret.

Understanding Acreage

An acre is a total area of 43,560 square feet. Acreage is not limited to one shape but can be round, oval, square, rectangular, triangular, or irregular as long as the square footage is correct. There are many ways you could create an area of 20 acres. Let's review a few:

The smallest possible perimeter for 20 acres would be a circle with a diameter of 1053.2 feet. The circumference is **3308.75 ft = 0.63 mile**.

The smallest possible plot with straight sides would be a square, with sides of 933.4 feet, and perimeter of **3,733.5 ft = 0.707 mile**.

But you can make 20 acres have as large a perimeter as you want, with no upper limit. For example:

A strip of land 10 feet wide and 87,120 ft (16.5 miles) long. Area = 20 acres. Perimeter = **33 miles and 20 ft**.

Fi-Shock provides complete energized fencing systems to control a wide variety of animals. A typical energized or electric fencing is a psychological barrier that keeps domestic animals in and wild animals out, even over long distances. High Tensile energized fencing systems can be both a psychological and a physical barrier for animals being controlled.

Safety: Energized fencing systems provide a safe alternative to woven and barbed wire fences. A pulsed electrical current is sent along the fence wire, about one pulse per second, from an energizer. These short electrical pulses produce a short and sharp but safe shock which translates to a psychological barrier that trains the animal to avoid the fence. The shock is sufficient enough that the animal will remember and stay away from the fence.

Ease of installation: Energized fencing systems install quickly with minimal tools, saving on labor.

Low cost: Cost savings is significant when compared to other fencing options such as wood rail, vinyl fencing, woven wire or barbed wire.

Flexibility: Fi-Shock systems give you the flexibility you need to design an ideal enclosure, whether a portable application, semi-permanent, as an add-on to a permanent perimeter fence or as a stand-alone high tensile permanent perimeter fence.

How energized fencing systems work:

A typical electric fence is a psychological barrier meaning that the animal will touch the fence and become "trained" not to go near the fence. The fence must be well-designed and constructed to absorb some pressure from animals, snow and wind. The energizer must have enough power for the length of the fence and for the animals being controlled.

When an animal comes in contact with an electrically charged fence wire, the animal will feel the electric current because the electrical charge passes through the animal to earth ground, thus completing the electrical circuit. If the animal and the ground terminal of the energizer are not sufficiently grounded, the path of electric current cannot be completed and the animal will not feel the shock. Since the earth is half of the electric fence circuit, it is very important to have a properly installed ground circuit. In areas where poor soil and earth grounding conditions exist, a two-wire system can be used with one wire being electrically charged while the other wire acts as earth ground. The "two-wire system" is utilized when there are alternating "hot" and ground wires installed.

Also, the electrically charged fence wire must always be properly installed and not be allowed to come into contact with shrubs, tall grass, and any other conductive objects on a continual basis. Otherwise the electric charge from the fence wire will lose its "shocking" power. Regardless of what wiring system is utilized, ground rod(s) and their connection to the energizer's ground terminal must always be used.

We hope this catalog provides the information you need to plan and install your Fi-Shock energized fencing system. For more information please visit our website at www.fishock.com.

SOLAR ENERGIZERS

SOLAR FENCE CONTROLLERS

Our solar fence energizers include gel cell batteries matched to the energizer's circuitry and solar panel. Once fully charged, the battery can maintain a charge for up to three weeks, even in cloudy or rainy weather, making them ideal for remote locations.

All Fi-Shock solar fence controllers use low impedance technology to maintain maximum energy levels. They can compensate for energy loss caused by vegetation or fence load, enabling them to power long fences with moderate weeds.

The large output models are effective in light to heavy weed conditions and are ideal for longer, multi-strand poly wire, tape, rope or high tensile fence systems. Use for all animals including predators.

Convenient carry handle and versatile mounting bracket allow for easy movement between locations and fast installation on wood posts, T-posts, U-posts, or on the sides of buildings.

| Model # | Description & Features | Output Voltage/ Energy | Master Ctn. | Animals Controlled |
|-----------|--|---|-------------|---|
| ESP10M-FS | Solar Powered, 10 Miles. 6 V battery-operated. Includes energizer, solar panel, 6 V rechargeable battery, and housing. Has intermittent DC output. | 10 KV (+/- 20%) open circuit .15 Joule | 1 | ALL |
| ESP5M-FS | Solar Powered, 5 Miles. 6 V battery-operated. Includes energizer, solar panel, 6 V rechargeable battery, and housing. Has intermittent DC output. Able to rotate on T-Post to face the direction of the sun. | 9 KV (+/- 20%) open circuit .1 Joule | 1 |       |
| ESP2M-FS | Solar Powered, 2 Miles. Resists shorts when fence is in contact with weeds and uses no fuse. Solar panel features compartmental damage-resistant construction. Has intermittent DC output. 4 volt battery. | 8 KV (+/- 20%) open circuit .04 Joule | 1 |    |

| | | |
|----------|------------------------------------|---|
| SB1R | 6V Rechargeable battery for ESP10M | 1 |
| SB3ZR | 6V Rechargeable battery for ESP5M | 1 |
| 301-569R | 4V Rechargeable battery for ESP2M | 1 |

GROUNDING

| Model # | Description | Features | Master Ctn. |
|---------|----------------------------------|--|----------------------|
| A-7 | Six Foot Ground Rod | Essential for proper grounding of fence energizers. Copper-coated ground rod. Weight: 5.10 lbs. each | 5 per carton |
| A-21 | 6 Ft. 5/8" Galvanized Ground Rod | Weight: 4.85 lbs. each Essential for proper grounding of fence energizers. | 5 per carton/ bundle |
| A-22 | 8 Ft. | Weight: 6.13 lbs. each | |
| GRC-FS | Ground Clamp | Heavy-duty, cast iron construction helps make a superior connection of ground wire to ground rod in a pegable bag. | 10 per carton |

AC FENCE ENERGIZERS

| | Model # | Description & Features | Output Voltage/ Energy | Master Ctn. | Animals Controlled |
|---|---------------|--|---|-------------|---|
|  | LOW IMPEDANCE | | | | |
| | EAC100M-FS | AC Powered, 100 Miles. 3 year warranty when registered online. Has intermittent DC output. UL listed. | 6 Joules | 1 |  |
|  | EAC50M-FS | AC Powered, 50 Miles. 3 year warranty when registered online. Has intermittent DC output. UL listed. | 2 Joules | 2 |  |
| | EAC25M-FS | AC Powered, 25 Miles. 2 year warranty. Has intermittent DC output. UL listed. | 1 Joule | 2 | ALL |
| | EAC10M-FS | AC Powered, 10 Miles. UL listed high-power, low-cost electric powered fence energizer. Has intermittent AC output. One year limited warranty. | 0.5 Joule | 2 |  |
|  | EA5M-FS | AC Powered, 5 Miles. UL listed high-power, low-cost electric powered fence energizer. Has intermittent AC output. One year limited warranty. | 0.1 Joule | 4 | |
| | EA2M-FS | AC Powered, 2 Miles. UL listed high-power, low-cost electric powered fence energizer. Has intermittent AC output. One year limited warranty. Plugs directly into outlet. with no power cord | 0.07 Joule | 4 | |
| SOLID STATE | | | | | |
|  | SS-9000X | DC or AC Powered, 20 Miles. This low impedance energizer can be plugged into a standard 110 VAC outlet or hooked to a 6 or 12 V battery. AC adaptor & battery clamps included. Has intermittent DC output. Two year limited warranty. | 8 KV +/- 20% open circuit voltage | 2 |  |
| | SS-1000X | AC Powered, 20 Miles. Solid-state, AC powered fence energizer. Strong enough to shock through weeds & grass. Fused panel protection. Uses two 1 amp fuses (301-402). Has intermittent DC output and is UL listed. Two year limited warranty. | 15KV +/- 20% open circuit voltage | 2 | |
|  | EAC10A-FS | AC Powered, 10 Acres. Has continuous AC current output. One year limited warranty. Do not use with poly tape, wire or rope. | 1.2 KV +/- 20% open circuit voltage | 2 |  |
| | EAC5A-FS | AC Powered, 5 Acres. For use with pets and small animals. Has an intermittent AC output and one year limited warranty. | 1.2 KV +/- 20% open circuit voltage | 2 | |
| | SS-725CS | AC Powered, 5 Acres. Plugs into a standard 110-120 V outlet. Has a continuous AC current output. One year limited warranty. | 800 V +/- 20% open circuit voltage | 2 | |
| SOLID STATE POULTRY ENERGIZERS | | | | | |
|  | SS-600 | AC, 1 Mile. Electric powered, continuous AC output. Effective for adult chickens and other poultry. One year limited warranty. | 800 VAC +/- 20% open circuit voltage | 1 |  |
| | SS-600HL | AC Powered, 1 Mile. Gives a choice of high or low output voltage. The light indicates unit is plugged in and operating properly. Has continuous AC output. One year limited warranty. | High: 800 VAC +/- 20% open circuit voltage Low: 600 VAC +/- 20% open circuit voltage | 1 | |

AC FENCE CONTROLLERS

AC-operated fence controllers are the best option where you have a reliable source of 110-volt electrical power. We offer a range of controllers for distances up to 100 miles.

- Rugged, weather-resistant cabinets
- Digital timing
- UL listed for key models
- Indicator light showing fence controller is working
- Easy-access terminals and mounting brackets that allow for quick connections and installation
- A 1 to 3 year warranty that includes damage caused by lightning

The large output models are effective in light to heavy weed conditions and are ideal for longer, multi-strand poly wire, tape, rope or high tensile fence systems. Use for all animals including predators.

DC FENCE ENERGIZERS

DC FENCE CONTROLLERS

Battery-operated fence controllers are ideal for remote locations or areas without access to AC power.

DC controllers feature:

- Rugged, weather resistant cabinets
- Digital timing
- Indicator light showing fence controller is working
- Easy-access terminals and mounting brackets that allow for quick connections and installation
- Warranties that include damage caused by lightning
- We recommend 6 or 12-volt rechargeable deep cycle batteries (not included with fence controller) —batteries must be checked and charged on a regular basis to maintain secure fence operation

The large output models are effective in moderate to heavy weed conditions and are ideal for longer, multi-strand poly wire, tape, rope or high tensile fence systems. Use for all animals including predators.

| | Model # | Description & Features | Output Voltage/ Energy | Master Ctn. | Animals Controlled |
|--|-----------|---|-------------------------------------|-------------|--|
|  | EDC25M-FS | DC Powered, 25 Miles. Operates off 12 volt battery. Battery clamps included. Has intermittent DC output. Two year limited warranty. | 1.2 Joules | 2 | ALL |
| | EDC15M-FS | DC Powered, 15 Miles. Operates off 12 volt battery. Battery clamps included. Has intermittent DC output. One year limited warranty. | .8 Joules | 2 |  |
|  | SS-9000X | DC or AC Powered, 20 Miles. This low-impedance energizer can be plugged into a standard 110 VAC outlet or hooked to a 6 or 12 V battery. AC adaptor & battery clamps included. Has intermittent DC output. Two year limited warranty. | 8 KV +/- 20% open circuit voltage | 2 |  |
|  | SS-2LGX | Nuisance Animal Energizer. Prevents damage from animal mischief. Powered by two D-cell batteries (not included). Includes a mounting stake which makes for easy installation. Has intermittent DC output. One year limited warranty. | 7.5 KV +/- 20% open circuit voltage | 2 |  |
| | SS-2DX | Pet Energizer. Prevents damage from animal mischief. Powered by two D-cell batteries (not included). Includes a mounting stake which makes for easy installation. Has intermittent DC output. One year limited warranty. | 7.5 KV +/- 20% open circuit voltage | 2 |  |

TESTERS

| | Model # | Description | Features | Master Ctn. |
|---|----------|-----------------------------------|---|---------------|
|    | DEFT-FS | Digital Voltmeter | Measures the voltage on an electric fence up to 19.9 KV and operates off a 9 V battery. Blister packed on a pegable card. Works with peak discharge, intermittent fence energizers. | 1 per carton |
| | A5LVT-FS | Multi-Light Electric Fence Tester | Lights calibrated to glow from 600 to 5500 volts ideal for measuring voltage drop between points along fence. Blister packer on pegable cards. | 5 per carton |
| | A1LVT-FS | Electric Fence Tester | Light indicates current flow through fence wire. Molded of high-impact plastic. Blister packed on pegable card. | 10 per carton |

PET & HORSE KITS

| Model # | Description | Features | Master Ctn. |
|-----------|---|--|-------------|
| SS-750RPX | Electric Fence Kit for Pets & Small Animals | Contains one UL listed electric fence energizer, ten 23" PVC fence poles, one 22" ground rod, 100 feet of aluminum wire, 50 cotter pins for fastening wire, one ground clamp, two extra fuses & easy to follow instructions. Has intermittent AC output. One year limited warranty. | 1 |
| A-20KX | Accessory Kit for Pets & Small Animals | Contains everything needed to assemble an electric fence system (excluding energizer) or to extend model number SS-750RPX (which includes the energizer). Kit contains: 18"-23" PVC fence poles, 1 two-foot copper-coated ground rod, 50 cotter pins, 1 heavy-duty ground clamp, 1 fence tester, 250 ft. spool 17 gauge aluminum wire and 1 electric fence warning sign. | 1 |
| A-15PX | 23" PVC Fence Poles | Made of heavy-duty PVC in a forest green color to blend with nature. Cotter pins not included. Packed 15 poles per carton. | 1 |
| A-30P | 23" PVC Fence Poles | Made of heavy-duty PVC in a forest green color to blend with nature. Cotter pins not included. Packed 30 poles per carton. | 1 |
| SS-725RP | Economy Pet Deterrent Kit | Contains one energizer, ten 23" PVC fence poles, one 22" ground rod, 100 feet of aluminum wire, 50 cotter pins for fastening wire, one ground clamp & easy to follow instructions. Has continuous AC output. One year limited warranty. | 1 |

HC-100 Portable Paddock

Electric fencing system perfect for containing 4-5 horses for short periods of time. Ideal for wagon trails, trail rides, polo matches and horse shows. Portable paddock is packed in a light weight canvas bag with a shoulder strap and comes with everything you need to quickly and easily set up a 25' x 25' double line enclosure or a 50' x 50' single line enclosure. Contains: Heavy duty nylon bag, above ground battery-operated electric fence energizer with mounting stake, eight 4 ft. step-in posts, 200 ft. spool of polytape, 4 corner bracing stakes, one 9" ground spike, 1 fence lead wire with poly tape clip, 1 ground lead wire with clamp, 4 adjustable corner bracing guy lines.

Model: HC-100 UPC 0-17051-11000-8
 Input voltage: 2-D cell batteries
 Master Carton: 1 per carton

ROUND/ROD POST INSULATORS

Round post insulators are molded from heavy-duty polyethylene and are designed to fasten electrified wire to round/rod posts without losing energy through the post. There are several styles to choose from because the insulator must match both the type of wire and the type of fence post being used. Using a good insulator is important in maintaining the performance of your fence.

| Model # | Colors | Description | Features | Master Ctn. |
|----------|--------|---------------------------------|---|---|
| IRY-FS | Yellow | Screw-on Round Post Insulator | Two molded pieces that will fit all posts 1/2" in diameter and smaller and can be used for wire, polyrope and polywire. | 10 bags per carton, 25 insulators per bag |
| IRCPY-FS | Yellow | Safety Cap Round Post Insulator | Single molded piece for use with 3/8" and 5/16" steel posts and will protect people and animals from sharp edges on the posts. May be installed with wire holders facing in any direction. Wide grooves allow for use with all gauges of electric fence wire. | 10 bags per carton, 25 insulators per bag |
| IRTY-FS | Yellow | Polytape Round Post Insulator | Two molded pieces with tape holder that locks/unlocks for easy installation of wire, polytape up to 2" wide and polywire. Tape holder holds tape tightly to limit movement. Can be used on posts between 1/4" and 9/16" in diameter. | 10 bags per carton, 25 insulators per bag |

STEP-IN FENCE POST

| Model # | Colors | Description | Features | Master Ctn. |
|---------------|----------------|--------------------------------------|---|---------------|
| A-48 A-48B | White Black | 4 Ft. (48") Step-in Fence Post | Molded clips hold electric fence wire & polytape (up to 2" wide). Molded from reinforced polypropylene with reinforced ribs for strength and a heavy-duty steel stake. Features large step-in flange and anti-rotation spike to keep stake from turning. | 50 per carton |
| P-30G | Green | 30" Step-in Post | Molded to hold wire, poly wire, poly rope and 1/2" poly tape. Made with reinforced polypropylene ribs and tip. | 25 per carton |

T-POST INSULATORS

The Fi-Shock T-post insulators are designed to be fastened to all standard T-posts (1.25" & 1.33") without losing energy through the post while requiring no additional hardware to install. There are several styles to choose from because the insulator must match both the type of wire and the type of fence post being used. Using a good insulator is important to maintain the performance of your fence. Fi-Shock T-post insulators snap on and around posts and are molded from high-density polyethylene with UV inhibitors. This prevents arcing and provides long life for all-weather performance.

| | Model # | Colors | Description | Features | Master Ctn. |
|---|----------------------|-----------------|---|---|---|
|  | IT2XY-FS | Yellow | Snap-on 2" Extender T-Post Insulator | One molded piece that fits all standard stubbed T-posts and extends the wire 2" from the post. | 10 bags per carton, 25 insulators per bag |
|  | ITY-FS | Yellow | Standard Snug-fitting T-Post Insulator | One molded piece that fits close and tight to all standard stubbed T-Posts. | 10 bags per carton, 25 insulators per bag |
|  | IT5XY-FS | Yellow | Snap-on 5" Extender T-Post Insulator | One molded piece that fits all standard stubbed T-posts and extends the wire 5" from the post. | 10 bags per carton, 25 insulators per bag |
|  | ITRXY-FS | Yellow | Snap-on 5" Reversed Extender T-Post Insulator | One molded piece that fits the reversed side of all standard stubbed T-posts extending the wire 5" from the post. | 10 bags per carton, 25 insulators per bag |
|  | ITSOY-FS | Yellow | Screw-on T-Post Insulator | Two molded parts ensures a tight, secure fit on all standard studded T-Posts & eliminates dislodging in high winds or under heavy loads. | 10 bags per carton, 25 insulators per bag |
|  | ITPLY-FS ITPLB-FS | Yellow Black | Pin-lock, Snap-on T-Post Insulator | One molded piece that fits all standard stubbed T-posts. Molded pin holds wire tightly. Pull pin to release the wire. The heavy duty flange holds insulator securely to T-Post. | 10 bags per carton, 25 insulators per bag |
|  | IWTPLB-FS | Black | Pin-lock Wood & T-post Insulator | One molded piece that fits all standard stubbed T-posts AND wood posts. Molded pin holds wire tightly. Pull pin to release the wire. Can be used with high tensile fencing systems. | 10 bags per carton, 25 insulators per bag |
|  | ITCPY-FS ITCPW-FS | Yellow White | T-post Safety Cap & Insulator | One molded piece that fits all standard stubbed T-posts while protecting people and animals from sharp-edged T-post tops. Accommodates any gauge polywire and polytape up to 2". Holds tape tightly to limit movement. | 10 bags per carton, 10 insulators per bag |
|  | ITTY-FS ITTW-FS | Yellow White | Polytape T-Post Insulator | One molded piece of heavy-duty material that fits all standard stubbed T-posts and can manage, wire, polytape up to 2" wide and polywire. Holds tape tightly to limit movement. Tape holder locks/unlocks for easy installation of wire and polytape. | 10 bags per carton, 25 insulators per bag |

WOOD POST INSULATORS

Wood post insulators allow you to fasten electrified wire or poly products to wood posts without losing energy through the post. There are several styles to choose from because the insulator must match both the type of wire and the type of post being used. Using a good insulator is important to maintain the performance of your fence. The Fi-Shock wood post insulators are nailed to the post and are molded from high-density polyethylene with UV inhibitors for all-weather performance. Most Fi-Shock wood post insulators come with a specialized long ribbed nail or double-headed nails for easy removal to relocate the insulator if desired. Fi-Shock is the only electric fence company to offer these specialized nails with each bag of selected wood post insulators.

| Model # | Colors | Description | Features | Master Ctn. |
|----------------------|-----------------|---|--|---|
| IW5XNY-FS | Yellow | Nail-on 5" Extender Wood Post Insulator | One molded piece, includes heavy-duty ribbed nails to secure insulator to the post nails. Extends the wire 5" from the post. | 10 bags per carton, 25 insulators per bag |
| IWNY-FS IWNB-FS | Yellow Black | Slant-nail Wood Post Insulator | One molded piece, includes double-headed nails. Extends wire 2½" from wood posts. | 10 bags per carton, 25 insulators per bag |
| IWTPLB-FS | Black | Pin-lock Wood & T-post Insulator | One molded piece fits all standard stubbed T-posts AND wood posts. Molded pin holds wire tightly. Pull pin to release the wire. Can be used with high-tensile fence. Nails not included. | 10 bags per carton, 25 insulators per bag |
| IWTNY-FS IWTNW-FS | Yellow White | Polytape Wood Post Insulator | One molded piece of heavy-duty polyethylene, including double headed nails. Can manage wire, polytape up to 2" wide and polywire. Holds tape tightly to limit movement. Tape holder locks/unlocks for installation of wire and polytape and holds tight to limit the movement of polytape. | 10 bags per carton, 25 insulators per bag |
| IWKNY-FS IWKNB-FS | Yellow Black | Economy Wood Post Insulator | One molded piece. Nails included. | 10 bags per carton, 25 insulators per bag |
| IWSIRB-FS | Black | Ring Wood Post Insulator | Unique insulated, angled slot ensures wire retention by screwing into wood post while working with wire, polywire or polyrope. | 10 bags per carton, 25 insulators per bag |

PORCELAIN INSULATORS

Fi-Shock porcelain insulators are produced from specially formulated electrical porcelain for superior insulation and strength. Fi-Shock porcelain insulators have the highest insulating properties for use in electric fencing and do not break down due to damage from the sun. When the Fi-Shock porcelain insulators are properly installed they will last the life of your fence. Porcelain insulators can handle any size fence wire including polywire and polyrope.

| Model # | Description | Features | Master Ctn. |
|---------|--|--|---|
| MP-4 | U-Shaped Corner/End Post Porcelain Insulator | Heavy-duty insulator for use with all fence wire, polywire and polyrope. Can be used on high-tensile fencing. Specially designed for the extra tension at corners and end posts. | 6 boxes per carton, 10 insulators per box |
| MP-5E | Ceramic Wood Post Porcelain Insulator | Single-groove wood post insulator with washer & double-headed nail. | 10 boxes per carton, 10 insulators per box |
| MP-6 | Small Corner/End Post Porcelain Insulator | These insulators can be used with all wire, polywire and polyrope, 1¼" diameter. Can be used with high-tensile fencing systems. | 25 boxes per carton, 10 insulators per box |
| MP-36 | Large Corner/End Post Porcelain Insulator | These insulators can be used with all wire, polywire and polyrope, 1¾" diameter. Can be used with high-tensile fencing systems. | 25 boxes per carton, 10 insulators per box |
| MP-1929 | Large Screw-in Porcelain Insulator | These heavy duty insulators can be used with all wire, polywire and polyrope, 2½" inch screw and 5¼" inch total length. Can be used with high-tensile fencing systems. | 25 insulators per carton |
| MP-1933 | Small Screw-in Porcelain Insulator | These insulators can be used with all wire, polywire and polyrope, 1¾" inch screw and 3½" inch total length. Can be used with high-tensile fencing systems. | 25 insulators per carton |
| MP-1986 | Screw-in Service Porcelain Holder Insulator | Made with hot-dipped galvanized steel base & strap with 2¼" screw. Can be used with high-tensile fencing systems. | 25 insulators per carton |

OTHER INSULATORS

Other insulators allow you to fasten electrified wire or poly products to posts and fences (such as chain link) without losing energy through the post or fence. There are several styles to choose from because the insulator must match both the type of wire and the type of fence post or fence being used. Using a good insulator is important to maintain the performance of your fence.

| Model # | Colors | Description | Features | Master Ctn. |
|-----------|--------|--------------------------------------|--|--|
| IUCLXY-FS | Yellow | Extension Bracket Insulator | For use on round or square posts, flat surfaces such as chain link fences and U-posts while extending wire 6" from fence/post. | 4 boxes per carton, 8 insulators per box |
| ICLXY-FS | Yellow | Chain Link Insulator | Heavy-duty bracket clamps securely to chain link fence while extending wire 4¼" from fence. | 10 bags per carton, 10 insulators per bag |
| ICY-FS | Yellow | Corner Post Insulator | Formed of thick, tough plastic to withstand strain of wire and is best for smaller, 15-17 gauge wire. | 10 bags per carton, 10 insulators per bag |
| ICDB-FS | Black | High Strain Corner and End Insulator | Designed for high strain, permanent or temporary electric fence and is best for 14 gauge wire or larger in high strain applications. | 10 bags per carton, 10 insulators per bag |
| ICJB-FS | Black | Large Corner Insulator | High-strength corner insulator molded of heavy-duty fiberglass-reinforced nylon. | 10 bags per carton, 10 insulators per bag |

GATES/HANDLES

| Model # | Description | Features | Master Ctn. |
|-----------|--------------------------------|--|------------------------------|
| AWPA-FS | Gate Handle Anchor | Insulated anchor to be used in wood posts to create hooks for electric fence gates. | 5 bags per carton, 2 per bag |
| ATPA-FS | T-post Gate Handle Anchor | Insulated anchor to be used with T-posts to create hooks for electric fence gates. | 5 bags per carton, 2 per bag |
| GHSK16-FS | Expandable Electric Fence Gate | Keeps electric fence gate taut with a highly visible spring, expands up to 20' and is electrified when closed, neutral when open. Includes galvanized spring, rubber gate handle, 2 pin-lock insulators, 1 ground connector & 1 hook assembly. Pegable card. | 6 sets per carton |
| GHHDB-FS | Heavy Duty Gate Handle | Insulating grip is soft and flexible with safety flanges for extra shock protection. Unique fastening plate ensures a secure wire connection. Will not break, crack or chip with abuse. Steel components are plated to resist rust. | 6 per carton |
| GHRY-FS | Rubber Gate Handle | Virtually indestructible and won't crack in cold weather. Tough polymer liner provides extra safety & strength. Available in a shelf ready display box. | 24 per carton |
| GHPO-FS | Plastic Gate Handle | Molded of tough, high quality plastic with shock-proof thickness for safe handling protection. Available in a shelf ready display box. | 24 per carton |

TOOLS

| Model # | Description | Features | Master Ctn. |
|---------|----------------------------|--|---------------|
| ATMP-FS | Multi-Purpose Fence Tool | Drop forged carbon steel tool with vinyl grips. Pulls staples, twists wire, cuts wire, and can be used as a hammer. Packed 1 per blister card. | 12 per carton |
| A-53 | Wire Stretcher | Grips any type wire (smooth, barbed and High-Tensile) to aid in splicing and stretching wire fencing. Securely holds both wire ends in place as you splice, making fencing repairs easier. Ruggedly built with strong hooks and powerful, easy-to-use ratchet action. | 4 per carton |
| A-54 | Woven Wire Fence Stretcher | Great for 48" to 52" woven fence: chain link fence from 36" to 48" and many others. U-channel holds wire fence firmly and allows fence to be pulled evenly and tightly. | 1 per carton |
| ATFC-FS | Fence Tool Combo | Two essential fencing tools combined. The easy fence tool makes unrolling barbed wire a one-person operation. The multipurpose fence tool pulls staples, twists wire, cuts wire, can be used as a hammer and is made of drop-forged carbon steel with vinyl grips in a pegable blister pack. | 6 per carton |
| 300-315 | Easy Fence Tool | Makes stringing barbed wire much easier and cuts fencing time drastically. One person can unroll wire. | 12 per carton |

| Model # | Description | Features | Master Ctn. |
|---------|-----------------------------|--|---|
| ALA-FS | Lightning Arrestor Kit | Air gapped, carbon disc type arrestor, helps protect fence energizer from damage caused by lightning. Packed in pegable clamshell. | 2 per carton |
| ACOS-FS | Cutout Switch | Use to switch off selected electric wires on a fence such as the lowest live wire when the grass is high. Handle prevents contact. One in each blister card. | 6 per carton, 1 per card |
| A-12T | Electric Fence Warning Sign | Two holes in top for fastening to fence wire or for nailing to wood post. Black ink printed on yellow polypropylene in three languages. Each sign is 8" x 4" packed three to a pegable bag. | 10 bags per carton, 3 signs per bag |
| A-71 | Line Tightener | Tightens wire up to 9 gauge and 1/2" polytape. No tools required and easy to use. Packed 5 per pegable clamshell. | 6 per carton |
| 301-402 | One Ampere Fuse | UL listed fuse. Convenient clip strip included in each master carton. | 5 cards per carton, 5 fuses per card |
| 301-404 | 1/16 Ampere Time-delay Fuse | UL listed fuse. Convenient clip strip included in master carton. | 5 cards per carton, 5 fuses per card |
| IT50 | 50' Insultube | Use for insulating hot feed wires to be strung overhead or underground to bring electricity to the fence. Can also be cut to insulate hot wires from neutral wires & to enclose wires buried underground for crossing underneath gateways. | 10 rolls per carton |

WIRE

| ALUMINUM WIRE | | | | | |
|---------------|--|---|---------------|------------------|-------------|
| Model # | Description | Features | Breaking Load | Tensile Strength | Master Ctn. |
| FW-00018D | 250 ft., 17 Gauge Spool Aluminum Wire | Low strain, basic wire with high electric conductivity. | 360 lbs. | 50,000 psi | 8 spools |
| FW-00001T | 1/4 mile, 17 Gauge Spool Aluminum Wire | Low strain, basic wire with high electric conductivity. | 90 lbs. | 38,000 psi | 4 spools |
| FW-00002 | 1/2 mile, 17 Gauge Spool Aluminum Wire | Low strain, basic wire with high electric conductivity. | 90 lbs. | 38,000 psi | 4 spools |
| FW-00004 | 1/4 mile, 15 Gauge Spool Aluminum Wire | Low strain, basic wire with high electric conductivity. | 150 lbs. | 38,000 psi | 8 spools |
| FW-00007T | 1/4 mile, 14 Gauge Spool Aluminum Wire | High strain, basic wire with high electric conductivity (not high-tensile). | 215 lbs. | 38,000 psi | 2 spools |
| FW-00008 | 1/2 mile, 14 Gauge Spool Aluminum Wire | High strain, basic wire with high electric conductivity (not high-tensile). | 215 lbs. | 38,000 psi | 4 spools |

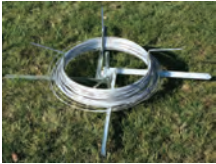

| GALVANIZED STEEL WIRE | | | | | |
|-----------------------|---|--|---------------|-------------------|-------------------|
| Model # | Description | Features | Breaking Load | Tensile Strength | Master Ctn. |
| WC-100 | 100 ft., 17 Gauge Galvanized Wire | Low Strain, basic wire. | 95-120 lbs. | 50,800-70,000 psi | 25 coils per ctn. |
| WC-250 | 250 ft., 17 Gauge Galvanized Wire | | | | 12 coils per ctn. |
| WC-350 | 350 ft., 17 Gauge Galvanized Wire | Low Strain, basic wire. | 95-120 lbs. | 50,800-70,000 psi | 8 spools per ctn. |
| WC-1320 | 1/4 mile, 17 Gauge Spool | Low Strain, basic wire. | 95-120 lbs. | 50,800-70,000 psi | 4 spools per ctn. |
| WC-2640 | 1/2 mile, 17 Gauge Spool | Low Strain, basic wire. | 95-120 lbs. | 50,800-70,000 psi | 2 spools per ctn. |
| WC-14200 | 200 ft., 14 Gauge Spool | High strain, basic wire (not high-tensile). | 200-240 lbs. | 50,800-70,000 psi | 8 spools per ctn. |
| FG-01000 | 1000 ft., 12.5 Gauge Aluminized High Tensile Steel Wire | This is a heavy duty wire made of galvanized steel and dipped in aluminum to maximize the flow of electrical current. Aluminum carries the electrical charge 4 times better than galvanized alone and electrical current travels on the very outer edge of the wire. This wire has the strength to be used on high tensile fencing and allows the maximum electrical current flow. | 1,400 + | 170,000 psi | 2 spools |

| SPECIALIZED STEEL WIRE | | | |
|------------------------|----------------------|--|------------------|
| Model # | Description | Features | Master Ctn. |
| UGC50 | 50' Insulated Cable | For use above or below ground. Made of nonconductive polyethylene which is surrounding a 12.5 gauge, 170,000 psi, class 3 galvanized wire. Weight: 2.77 lbs. per coil | 4 coils per ctn. |
| 500-552 | 200' Insulated Cable | For use above or below ground. Made of nonconductive polyethylene which is surrounding a 12.5 gauge, 170,000 psi, class 3 galvanized wire. | 1 spool per ctn. |

Zareba branded High-tensile fencing systems are an affordable, often electrified fence system that is an excellent choice for perimeter fences. When built correctly, a high-tensile fencing system will provide a permanent barrier to contain or exclude animals for years. These sturdy, permanent fences require braced corner and end posts (6-8" diameter) in wood along with special insulators, hardware, and tools that maintain constant high tension on metal wire. High-tensile fencing systems are considered a psychological AND physical barrier, meaning the fencing is strong enough to stop the animal. Because the wire can be very tight (about 250 pounds), wood posts (over 4 inches in diameter) can be placed 30-90' apart which is more than double what is required for regular fencing systems, thus reducing costs.

| | | | | |
|--|----------|---|---|----------------------------------|
|  | Model # | Description | Features | Master Ctn. |
|  | 200-260 | Multi-Groove Poly Spacer | 49" tall high-density polyethylene, UV stabilized and notched at every inch. Attach to wire with spacer clip (model 400-430T). | 12 per carton/ bundle |
|  | HTWC-Z | High-Tensile Wire Cutters | Specially hardened jaws cut 12½ gauge hightensile fence wire. Comfortably shaped handles lock closed to carry & spring open to use. Packed in a pegable blister pack. | 2 per carton |
|  | HT4SCT-Z | Four Slot Crimping Tool | Four slots allow a wide range of wire or cables to be spliced with one tool. 1-2 slot for 14½ & 15½ gauge wire. 2-3 slot for 12½ gauge wire. 3-4 slot for 10 & 11 gauge wire & 14 & 15 gauge barbed wire. | 1 per carton |
|  | HTSJ | Spinning Jenny with Brake | Allows easy payout for coiled high-tensile fence wire, includes built-in-brake to prevent wire from uncoiling. Holds up to 2,000 and 4,000 foot coils and adjusts to fit 17" to 24" inside diameter of coil. Some assembly required. | 1 per carton |
|  | 300-305 | In-Line Strainer Handle | Made of hot-rolled flat steel formed to fit the inline-strainer (model # 400-400CC). Durable paint finish prevents rust. Use caution when tensioning high tensile wire. | 10 per carton |
|  | HTTT | Three Hole Twisting Tool | Essential tool for twisting or bending high-tensile wire or for use to wrap Multi-Groove spacer clips (model 400-430T) to wire while securing poly spacer posts (model 200-260). Use for 12½, 11, and 9 gauge wire in a pegable bag. | 10 per carton 1 per bag |
|  | 400-399 | Heavy Duty In-Line Strainer with Compression Clip | Can be adjusted using a standard wrench. | 25 per carton |
|  | ILS | In-Line Strainer with Compression Clip | Applies high-tensile compression on high-tensile fence line. Use to tighten high-tensile wire. Under compression, it automatically feeds into cog reel. Galvanized to deter rust. Install strainers every 2,000' to 2,500' and should be located in the middle of long runs of wire or between two corner posts. Strainers will need to be placed more often when there are corners, bends, dips and rises in the fence. Model 300-305 is used to tighten. | 50 per carton |
|  | HTTS | Tension Spring | Use to indicate tension of wire. One inch of compression equals 150 pounds of pull. Use in conjunction with in-line strainer for each leg of fence. Galvanized to deter rust. Helps absorb expansion and contraction of the fence wire. One tension spring should be used with every in-line strainer. | 20 per carton |
|  | HTBP5 | 5" Galvanized Brace Pin | Use to attach horizontal brace post to vertical posts in corner and brace post assemblies. Use one brace pin with each post in each single or double brace assembly. Made of 3/8" carbon steel galvanized rods. | 10 per carton, 5 rods per box |

| | Model # | Description | Features | Master Ctn. |
|---|------------|--------------------------|---|---|
| | HTBP10 | 10" Galvanized Brace Pin | Use to attach horizontal brace post to vertical posts in corner and brace post assemblies. Use one brace pin with 6" x 8" post in each single or double brace assembly. Made of 3/8 carbon steel rods & galvanized. | 10 per carton, 5 rods per box |
|  | HTFPB | Large Fence Post Bracket | Heavy 16 gauge galvanized steel for wood fence. Use to connect 3"-6" diameter rail to 7"-8" diameter posts. | 6 per carton, 8 per clamshell |
| | HTBS | Barbed Fencing Staples | Top quality, made from class 3 galvanized wire which lasts three (3) times longer than class 1 staples. Solve the problem of loosening line wire by increasing the staples grip in the post. | 5 lb per box/1 box per carton |
|  | HTGCS1225 | Crimping Sleeve 1-2 | Use to splice 14½ & 15½ gauge wire. Use crimping tool (model 300-320) to crimp and hold lines together, packed in a pegable bag. | 10 bags per carton, 25 per bag |
| | HTGCS2325 | Crimping Sleeve 2-3 | Use to splice 12½ gauge wire. Use crimping tool (model 300-320) to crimp and hold lines together, packed in a pegable bag. | 10 bags per carton/100 per bag |
| | HTGCS23100 | Crimping Sleeve 2-3 | | 10 bags per carton/25 per bag |
|  | HTGCS3425 | Crimping Sleeve 3-4 | Use to splice 10 & 11 gauge smooth wire or 14 & 15 gauge barbed wire. Use crimping tool (model 300-320) to crimp and hold lines together, packed in a pegable bag. | 10 bags per carton, 10 per bag |
| | HTGCS4525 | Crimping Sleeve 4-5 | Use to splice 9 gauge wire or 12½ & 13½ gauge barbed wire. Use crimping tool (model 300-320) to crimp and hold lines together, packed in a pegable bag. | 10 bags per carton, 10 per bag |
|  | HTPSCLIP | Multi-Groove Spacer Clip | Galvanized clip for poly & wood spacers. Use with 3-hole twisting tool (model 300-309) to attach spacer tightly to high-tensile wire. Packed in a pegable bag. | 5 bags per carton, 25 per bag |
|  | HTWL | FWT 3-4 Electric Tap | Use to secure by crimping wire connections to existing wires, in a pegable bag. | 10 bags per carton, 10 taps per bag |
|  | HTWL12 | 12.5 Gauge Wire Link | Easily connects 12.5 gauge wire, including high tensile wire | 5 per blister, 5 blisters per case |
|  | HT4FTI25 | 4" Ribbed Tube Insulator | The patented ridge design enables the staple to lock without penetrating insulator profile with non - conductive polyethylene. | 10 boxes per carton/200 insulators per box |
| | HT4FTI200 | | | 5 bags per carton/25 insulators per bag |
|  | HT20WAI10 | Wraparound Insulator | Use for tying off electric wires at end & gate posts. Made of nonconductive polyethylene with an aluminum insert for strength. 20" long to wrap around most corner and end posts. | 10 bags per carton, 10 insulators per bag |

POLYROPE, TAPE & WIRE

| | Model # | Description | Features | Breaking Load | Master Ctn. |
|---|-------------|------------------|---|---------------|---------------------|
|  | PR656W6-FS | Monofil Polyrope | 200 meter/656 feet spool, 6 strands of electrical conductors. | 820 lbs. | 2 spools per carton |
|  | PW656Y6-FS | Polywire | 200 meter/656 feet spool, 6 strands of electrical conductors. | 180 lbs. | 6 spools per carton |
|  | PW656Y9-FS | Polywire | Heavy duty 200 meter/656 feet spool, 9 strands of electrical conductors. | 310 lbs. | 6 spools per carton |
|  | PW1320Y6-FS | Polywire | 400 meter/1320 feet spool, 6 strands of electrical conductors. | 180 lbs. | 6 spools per carton |
|  | PW1320Y9-FS | Polywire | Heavy duty 400 meter/1320 feet spool, 9 strands of electrical conductors. | 310 lbs. | 6 spools per carton |
|  | PT500W2-FS | 2" Polytape | 152 meters/500 feet spool, 14 strands of electrical conductors. | 890 lbs. | 2 spools per carton |
|  | PT656W1-FS | 1" Polytape | 200 meter/656 feet spool, 8 strands of electrical conductors. | 320 lbs. | 4 spools per carton |
|  | PT656WH-FS | 1/2" Polytape | 200 meter/656 feet spool, 5 strands of electrical conductors. | 150 lbs. | 6 spools |

POLYROPE CONNECTORS

|  | Model # | Description | Features | Master Ctn. |
|--|----------|-------------------------------------|---|--------------|
| | PARS-FS | Polyrope Connector | Used to splice the ends of polyrope (model PR-200) together. Packed 1 per blister card. | 5 per carton |
| | PAHTS-FS | 1/2" Polytape Splicer | Used to splice the ends of 1/2" polytape (model PT-200) together. Packed 3 per blister card. | 5 per carton |
| | PA1TS-FS | 1" Polytape Splicer | Used to splice the ends of 1" tape (model PT-190) together. Packed 3 per blister card. | 5 per carton |
| | PA2TS-FS | 2" Polytape Splicer | Used to splice the ends of 2" polytape (model PT-65) together. Packed 3 per blister card. | 5 per carton |
| | PAHTE-FS | 1/2" Polytape End Connector | Used at the ends of 1/2" polytape for dead-ending or gate handle type connection. Packed 3 per blister card. | 5 per carton |
| | PATE-FS | Polytape to Energizer Connector | Used to connect poly tape or poly wire to an energizer. | 5 per carton |
| | PATT-FS | Polytape to Polytape Connector | Used to connect hot polytape to hot polytape for purposes of bypassing a grounded wire. | 5 per carton |
| | PAWPC-FS | Wood Post Polytape Corner Insulator | Used as an insulator to end the tape or turn a corner with wood post. | 5 per carton |
| | PATPC-FS | T-post Polytape Corner Insulator | Used as an insulator to end the tape or turn a corner with a T-post. | 5 per carton |

FENCING TERMS

Alternating current

Current that flows back and forth, changing directions rapidly. AC current is typically used in households in the United States and Canada. It reverses directions 120 times per second or 60 full cycles.

Amperage (Amp)/(Ampere)

A measurement of electrical current; what you feel when you receive a shock. The higher the amperage, the more intense shock the animal will feel.

Baiting

Used to train wild animals to avoid an electric fence. Turn off fence controller. Smear an aluminum pie tin with the bait (peanut butter, honey, rancid bacon, molasses, etc.). Connect pie tin to an electric fence wire using metal wire. Locate several baited pie tins around the perimeter of the fence. After baiting is completed, turn fence controller on and monitor bait stations regularly.

Capacitive discharge

A term used to describe electric fence controllers that utilize a capacitor discharge pulse of electricity at regular intervals through a fence, typically at one second intervals.

Conductor

A material through which current will readily flow. All metals are conductors.

Continuous current

Refers to a continuous output of alternating current (AC) rather than a pulsed or cycled output. Continuous current energizers produce sufficient levels of voltage and extremely low amperages in order to keep them safe. These energizers do not work well on long, weedy or wet fences. Continuous current fencers are not UL listed.

Current

It is the current, the duration and rate of its flow which causes the shock. With respect to electric fencing, if the fence loading conditions increase then the output current decreases.

Corner posts

Sturdy wooden posts driven deep (3'+) into the ground to provide extra support for the tension put on a fence line as it changes direction. Corner posts are not only used at corners, but also for gates and end posts.

Direct current

Current that flows steadily in one direction, typically produced by batteries through a chemical reaction.

Distance ratings

A way of comparing the relative power of fence controllers. Ratings are based on a single strand of 17-gauge steel wire strung 36 inches above the ground under ideal, weed-free laboratory conditions.

Energizer (Charger, Fencer)

Different parts of the US have different names for the energizer, some of these include "Charger" or "Fencer." All do the same thing, which is to increase the volts and decrease the amp. The energizer controls the energy that is "pushed" through the fencing wire. Fi-shock energizers are made in the US.

Fence load

Any number of conditions that cause current to be drawn from a fence wire. Weeds touching the fence, broken insulators, rusty fence wire,

and even wire splices all increase fence load and reduce the fence's voltage and amperage. Fence load is measured in resistance (ohms).

Ground wire return system

Used where dry or sandy soil conditions do not allow a traditional ground system to work. Consists of running a ground wire parallel to a hot fence wire, delivering at the point where the animal touches the two lines.

Ground System

Necessary to create a complete electrical circuit: when an animal stands on earth ground and touches the electrified wire, the electricity travels through the animal, into the soil, and back to the ground rods that are connected to the fence controller, resulting in the animal receiving a brief shock. A ground system consists of ground rods (3), hookup wire, ground rod clamps and line clamps.

High tensile

High-tensile fencing systems are an affordable, often electrified fence system that is an excellent choice for perimeter fences, providing a permanent barrier to contain or exclude animals. These sturdy, permanent fences require braced corner and end posts in wood along with special insulators, hardware, and tools that maintain constant high tension on metal wire. High tensile fencing systems are considered a psychological AND physical barrier meaning the fencing wire is strong enough to stop the animal with or without an electrical charge.

Induction

In terms of the fence line, this is the transfer of power without physical contact, from an electrified wire to a non electric wire or gate. This is usually noticed by touching a wire on the conventional fence (or gate) and finding it "live". This phenomenon is more noticeable in damp weather conditions.

Insulator

A nonconductive material (plastic or porcelain), typically used to offset fence wire from a fence post. Insulators prevent the current from traveling through the post and into the ground, short-circuiting the system. All Fi-Shock insulators are made from high quality plastic material giving optimum insulation properties.

Joules (Joule)

A measurement of electrical energy used to rate low impedance fence controllers. The effective power the controller delivers to the fence, independent of other factors that can drain voltage. The higher the joules, the more intense shock the animal will feel. (1 joule = 1 watt of power for 1 second).

Line posts

A post used to support electric or nonelectric fence wire. Line posts support the fence line, and have far less tension put on them than corner posts. As a result, they can be made from a variety of materials, including metal, wood, plastic and fiberglass.

Live (Hot) Wire

The wire connected to the energizer power (+ or positive) terminal which carries the electrical current.

Low-impedance Energizer (Fencer) (Charger)

Low impedance means low internal resistance of the energizer. Low impedance fence controllers increase the joules (energy or shock) on the fence

line if weeds or other vegetation touch the line. This means that as long as the wire remains in contact with the charger; the energy can push past the weeds or vegetation to keep the fence hot. Low-impedance technology is available in AC, DC and solar powered models.

Ohms

Ohms are used to measure resistance to the flow of an electric current. A low ohms reading represents a heavy fence load, and a high ohms reading represents a light fence load.

On-time / Off-time

On-time refers to the duration of the electrical pulse produced by a capacitive discharge fencer. Off-time refers to the length of time between the pulses. Fencers have electrical pulses that are only microseconds long, followed by one full second of off-time between each pulse. This long off-time enables an animal (or person) to easily break away from the fence.

Resistance

Resistance is any force that resists the flow of electricity, consuming power from a circuit by changing electric energy into heat. Electricians measure resistance in ohms.

Rotational grazing

The tendency among certain species of animals is to graze vegetation down to the dirt. This can cause animals to reach for vegetation outside the fence. Rotational grazing is a system for livestock grazing, using internal temporary enclosures (within a boundary / permanent fence) to control the specific areas where the animals graze. This allows the vegetation in the previous enclosures to grow back. Typically is 1-strand of wire at 40" or at animal's nose level.

Short

A short is a loss of voltage from the fence line to the ground which can be caused by a live (hot) wire touching a post, vegetation, ground or ground wires.

Splicer

An electric fence splicer joins together separate strands of fence wire, tape or rope without breaking the fence's electrical circuit.

Temporary fencing

A one to three-strand electric fence system that is used for rotational grazing or other short-term uses. It typically uses step-in poly posts or rod posts, and a DC or solar operated fence controller for portability and flexibility.

Tensioner

A component used to tighten fence wires, typically polytape, to increase tension on a section of the fence line.

Voltage (Volt)

A measurement of electrical pressure which creates the current flow. It functions similarly to water pressure in that it "pushes" amperage down the fence wire.

Watt

A unit of measurement for electric power equal to voltage times amperage.
